

OUR GREEN COMMITMENT

When you buy a Christopher Companies home, you're not only buying a **high quality, hand-crafted, new home**, you're selecting a builder that **cares about improving the environment**.

At Christopher Companies, we strive to continuously improve our building process to maintain an environmentally responsible and resource-efficient cycle. From the insulation and windows to the interior features, there are a variety of different design and construction elements that play a part in both improving conditions for our environment, as well as saving you money on your utility bills. We'll prove it.

CHRISTOPHER COMPANIES RECOGNIZED AS HOME INNOVATION NGBS GREEN PARTNER OF EXCELLENCE

Christopher homes are certified under the National Green Building Standard, which means they've passed the inspection that requires several different green practices be met. **Christopher Companies has more NGBS certified projects in Delaware than any other builder and are among the top two builders in Virginia.**

All new Christopher homes are ENERGY STAR® Certified.

Each ENERGY STAR® certified home reduces greenhouse gases by 3,700 lbs. per year, and use 15-30% less energy compared to a typical home. For almost a decade, the Christopher Companies has been awarded as an ENERGY STAR Certified Homes Market Leader Award and has participated in the program for over a decade. To date, Christopher Companies has certified over 350 homes in both Virginia and Delaware, placing us **within the top 30 builders in both states.**

What does it mean to be a certified homebuilder?

Installing energy-efficient and water conservancy appliances
Advanced framing techniques
Low VOC-materials
Quality insulation
High performance filtration
+ SO MUCH MORE!

Christopher Companies is a proud partner of Virginia Energy Sense. The Virginia Energy Sense program provides the tools to educate and empower all Virginians to get involved and lower the amount of electricity they use. Reducing energy use puts money back in consumers' pockets. It also helps our state's economy and cleans our air, land and water. That's why saving energy just makes good sense.
